

Newly Developed

Recommend for preservative & antiseptic products ! Antiseptic Aroma distilled water

COSMEDIA has developed an aroma distilled water that could be used for preservative of products. It is organic JAS cultivated that could be utilized for acquisition of natural product or organic certification. Using the plants cultivated in Japanese soil and highly recommended for products claiming "MADE IN JAPAN" .

Antiseptic performance

Test bacteria

Staphylococcus aureus

Escherichia coli

Pseudomonas aeruginosa

Test results

Type of fungus	Initial viable bacterial count (CFU/mL)	Viable bacterial count after 60 minutes (CFU/mL)	Viable bacterial count after 4 days (CFU/mL)
Staphylococcus aureus	5.1×10^6	3.5×10^6	No bacteria found
Escherichia coli	9.0×10^6	2.1×10^6	No bacteria found
Pseudomonas aeruginosa	5.9×10^6	1.9×10^6	No bacteria found

Indication	INCI
Lemon grass water	CYMBOPOGON SCHOENANTHUS WATER
