『Bacteria activation care』

Photo aging care!
“yeast fermented water” with
evidence instead of water

We have found rare marine derived yeast with the merit of ocean that is the source of our lifeform off the coast of Yoron island in the most southern part of Kagoshima prefecture.

It is a unique fermented liquid that brings out various effects on the skin by fermenting the yeast with original composition.

Please use this yeast fermented water with evidence instead of purified water that is the base of cosmetics. We are available with cosmetic OEM/ODM.

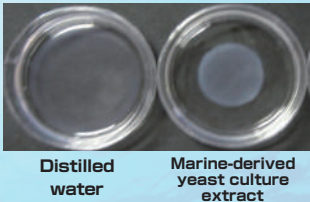

Shows multi-effect marine derived yeast fermented liquid

Evidence specialized on photoaging

Collagen gel shrinking effect test Elasticity·Astringent

Collagen gel shrinking activation has been confirmed

What is collagen gel shrinking effect test? Test to confirm the tightening (shrinking) effect using the artificial dermis (Collagen with cells) from the recovery of ultra violation damage.

Collagenase activation inhibitory effect test Wrinkle·Sagging

Collagenase activation inhibitory effect was confirmed

What is collagenase activation inhibitory effect test? Test to confirm whether activation of the enzyme (collagenase) dissolving the collagen could be inhibited.

Hydrogen peroxide elimination effect test Aging care

High hydrogen peroxide elimintation effect was confirmed

What is carbon peroxide elimination effect test? This is a test to confirm the elimination effect of the carbon peroxide (Anti oxidation effect) that is said to be the cause of various aging factors.

Fibroblast activation effect test Aging care

Fibroblast proliferation effect is confirmed

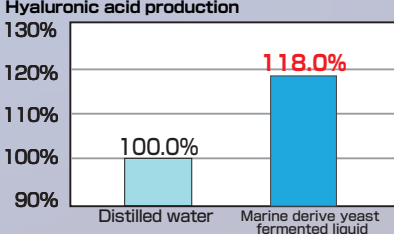

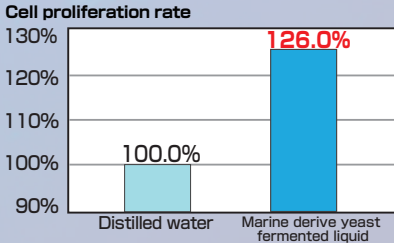

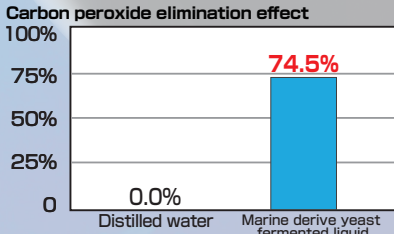

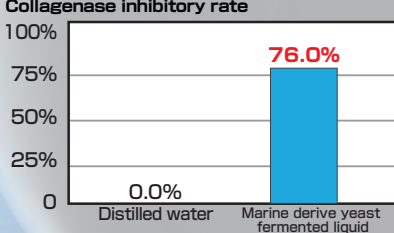

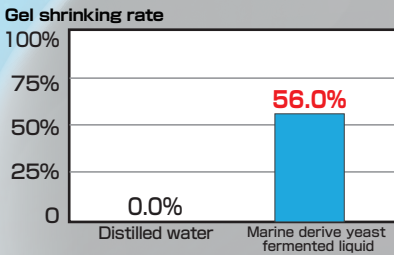

What is fibroblast proliferation effect test? It exists in dermis. It is a test to investigate the effect to energize (proliferate) fibroblast that produces collagen, elastin and hyaluronic acid by cell proliferation rate.

Hyaluronic acid production promotion effect test Moisture

Increasing hyaluronic acid production with expected moisturization

What is hyaluronic acid production promotion effect test? Test to confirm whether the fibroblast is able to promote the production of hyaluronic acid.
