

Our efforts towards clean beauty

Issues such as poverty, human rights and climate change have become "urgent issues" around the world.

Knowing when, where, and who made the products and services we consume, exploit producers taking actions such as buying things that do not encourage or have a low environmental impact is a clue to solving social problems.

COSMEDIA, cosmetic manufacturing company consider about the producers and environment and we are working through cosmetics to be benevolent to customers.

Human / Society

• Recruiting disabilities

People with disabilities are playing an active role in outsourcing work in their own factories and external employment support facilities and cultivating raw materials.

• Fair Trade

We trade equally & fairly.

Region

• Local product & consume

Processed into raw ingredients using plants cultivated both in Yokohama and consider about the emission of CO2 by transportation.

• Promotion of local economy

Promoting the local economy with development partnering farmers in Yokohama / Yoron island where the factory is situated

Environment

• Organic • Pesticide-free

Supplied materials cultivated in our farm or contracted farm is either organic or pesticide-free.

• Chemical free ingredients

We do not use chemical ingredients in our cosmetic raw materials

• Cruelty-free

We do not conduct animal test for developing raw ingredients and the cosmetics

What we can do by able to understand both "responsibility" that are "responsibility to produce" & "responsible for use" through the cosmetics. "Through organics" "Avoid containing chemical substance as possible" "Select animal cruelty raw ingredients" . We will propose to your understanding of clean beauty that your company conceive.
